

Additional conditions Equipe Transport Insurance

The horses listed on the insurance policy in accordance with these terms and conditions are insured against the events listed under articles ET-1 to ET-4.

These articles contain additional provisions and indicate the amount of compensation.

Article ET-1: Death

The insured horses are insured against sudden and unexpected death or necessary culling by:

- illness
- accident
- unsuccessful life-saving operations
- noodeuthanasia
- drowning
- fire, explosion, lightning, electrocution
- smoke poisoning, poisoning as a result of an inoculation necessary to prevent damage under this policy
- lightning strike

It must have been established that treatment is not possible, this in consultation with us and possibly with our veterinary advisor.

If it is necessary for the veterinarian to finish the horse, you must first ask our permission. This permission does not apply in directly life-threatening cases.

The compensation amounts to 100% of the insured value.

Article ET-2 Insured period

The horse mentioned on the policy is insured for the period stated on the policy schedule.

Article ET-3 Coverage within the EU (with the exception of countries which joined the EU from 2004)

This cover applies within the EU (with the exception of countries that joined the EU as of 2004) if the sudden death or necessary culling occurs within 5 days after the occurrence of the damage or after the first symptoms of illness.

Article ET-4 Coverage outside the EU

This cover is valid outside the EU if the sudden death or necessary culling takes place before the horse is unloaded for the first time from a truck, boat or plane.

Article ET-5 validity

This insurance only applies if your horse is travelling to the Netherlands or Belgium and will stay there.
