

OUR VEHICLES

The home base of World Horse Transport B.V. is located in the middle of the Netherlands. From here the trucks leave every day. The capacity of our trucks varies from 2 to 18 horses.

In order to make the transport of your horse as safe and comfortable as possible, our vehicles meet the latest requirements in the field of safe transport. In addition, they are equipped according to the legal EU standard. That means:

- Well maintained and modern fleet of only Mercedes Benz vehicles
- EU certificate for transport of more than 8 hours
- Fans
- Constant camera surveillance from the cabin
- Light and air displacement in the car
- GPS and temperature recording
- Water supply for the horses
- Rubber upholstery on both the walls and floors

All our vehicles are cleaned and disinfected weekly to prevent diseases and infections. This makes our transport attractive, safe and reliable.

WORLD HORSE TRANSPORT

World Horse transport specializes in professional National and International logistics of horses, storage and quarantine. A profession on its own right, but with the now 20 years of experience of our employees, your horse is in good and trusted hands. On the following pages you can see the options such as private transport and combined transport, but if you want to have your horse transported to another continent, it is no problem at all. Then you also fill in our quotation request, and we will transport your horse to the requested destination together with our even specialized colleague.

We take care of your horse

We transport your most precious possessions safely, professionally and with expertise. All drivers have years of experience with horse transport and everything that goes with it. Your horse will be taken to the next destination with great care and attention, and we also ensure clear communication and a reliable logistics process. In this way we take care of the entire process of transporting your horse.

TRANSPORTING YOUR HORSE

Inspection, import and export papers

Transporting horses involves a lot of paperwork. From the request for transport to the inspections that your horse has to pass before he can get on the road.

When your horse is transported abroad, an NVWA inspection must be carried out. An export inspection. This inspection shows whether your horse is healthy and fit enough to be transported.

We can request these inspections quickly and easily for you. Thanks to our many years of experience, we are familiar with all the steps that precede the transport and are happy to help you with that.

National, international and intercontinental

On a weekly basis, we provide transport for carousel groups, equestrian camps and horses

for private customers within the Netherlands. Every other week we have a truck on the routes in Belgium, France, Spain, Portugal, Germany, Denmark, Norway and Sweden and we regularly drive in the United Kingdom, Italy, Finland, Switzerland, Austria and the Czech Republic. We can reach all EU countries by truck. Thanks to our close cooperation with agents all over the world, intercontinental transport is also made possible.

Private and combined transport

We distinguish between private and combined logistics. During a private transport of your horse, one customer books a car that is only available for him or her horse(s). In combination transport (also known as co-loading), we place several horses together on a route that we have indicated.

We transport horses for everyone, where everything is focused on service and safe transport of your most precious possession.
